

# Self-Repairing Rhizomes Tillers

## Self-Repairing Rhizomes/Aggressive Tillers

Over time all turf areas will experience some sort of damage, leaving bare spots. Most tall fescue varieties have only a limited ability to fill in these blank spots. Titan Rx, has been specifically **selected to produce rhizomes** (or underground shoots), enabling it to provide increased density and **fill in bare spots** with brand new plants. Titan Rx also has **aggressive tillers**. As shown in these photos, **Both rhizomes and tillers can help fill in bare spots.**
