Solid Disease Resistance

Titan Max has been bred for improved resistance to multiple diseases including gray leaf spot, Pythium blight, brown patch, pink patch, pink snow mold, Typhula blight, and red thread.

Good for Sun and Shade

While all grasses need sunlight, Titan Max is capable of handling extra shade from mature trees and shaded areas.

Maximum Playability

Titan Max is very dense, providing improved durability, traffic tolerance and resistance to weed infestation. Soft enough for bare feet, yet tough enough for athletic play and heavy wear.
